1 | INTRODUCTION: STATEMENT OF REASONS

In recent years there has been an unprecedented institutional, social and business mobilisation to respond to the major sustainability challenges: environmental, social and good governance (ESG).

The global adoption in 2015 of the Paris Agreement on Climate Change¹ and the United Nations Sustainable Development Goals aims to move towards a more sustainable economy, which improves the future of our planet and of future generations. To support these goals, the European Union, through the European Green Deal, sets the goal of making Europe the first carbon-neutral continent by 2050 and expects the financial sector to play an active and relevant role in this transition, as established in the [Action Plan for Financing Sustainable Growth](#)².

Ibercaja is aware of the challenge posed by sustainability: “consider environmental impact (including climate and biodiversity), social, human and economic impact in business decisions to achieve long-term sustainable value creation”³.

Since the start, Ibercaja has been an entity with a clear social commitment to the development of its activity, focused on supporting the country, the business fabric and the most vulnerable groups. Along these lines, it continues moving forward to respond to the growing sustainability-related needs.

In the development of its financial activity, Ibercaja firmly believes that its plans and actions should help ensure well-balanced economic growth, social cohesion and environmental protection, pursuant to its corporate purpose. For this reason, Ibercaja is firmly committed to the Sustainable Development Goals of the 2030 Agenda, and is a signatory of the United Nations Principles for Responsible Banking to advance in the configuration of a sustainable banking system.

THE CHALLENGE OF IBERCAJA

The challenge that Ibercaja has taken on is to ensure that the business objectives promote sustainable development, preserving natural resources and promoting a more just and inclusive society. To do this, it is progressing with the integration of ESG (environmental, social and good governance) aspects in the strategy and in decision-making.

¹ UNITED NATIONS (2015), PARIS AGREEMENT.

² EUROPEAN COMMISSION (2018), ACTION PLAN: FUNDING SUSTAINABLE DEVELOPMENT.

³ EUROPEAN COMMISSION - QUERY ON SUSTAINABLE BUSINESS GOVERNANCE, OCT 2020.

IBERCAJA'S SUSTAINABILITY STRATEGY IS BASED ON FIVE CORNERSTONES:

1. **ESG RISKS:** identification and management for its gradual integration into the Entity's global risk analysis.

2. **SUSTAINABLE BUSINESS:** analysing needs and identifying opportunities for business development that accompanies customers in the transition to a sustainable economy, including climate change.

3. **PEOPLE:** comprehensive development of employees, training them with the necessary training for the new context and promoting work, personal and family balance.

4. **TRANSPARENCY** for all its stakeholders, promoting communication of both financial and non-financial aspects of the business.

5. **PROTECTION OF THE ENVIRONMENT** and its resources, mitigating climate change, and favouring the development of a more inclusive and egalitarian **society**.

In view of the foregoing, this document contains the Ibercaja Group's Sustainability Policy, as a declaration of its firm desire to contribute to the development of a more sustainable economy and financial activity, aligned with the principles, guidelines and current regulations on the matter.
